

Alternative Irrigation Water Source Registration

City of Fort Worth

Water Conservation

As part of City of Fort Worth Water Conservation ordinances (Sect. 35-167, b) anyone using a source other than the City's potable water supply to irrigate their property is required to receive prior written approval and register their property with the City's Water Department. Additionally, these alternative sources are subject to verification and inspection, and must meet federal, state and city requirements for cross connection control and backflow devices.

Using alternative water supplies for irrigation also exempts property owners from the 10 a.m. to 6 p.m. prohibition on landscape watering.

To register an alternative water source, complete this form and fax it to 817-392-8735. *(A separate form is required for each location where alternative source water is used.)* Please direct any questions to the Water Department's Water Conservation Division at 817-392-8740.

Type of Alternative Water Source(s) *Check all that apply*

☐ Well ☐ Rain Catchment ☐ Water Reuse ☐ Surface Water Retention Pond
